

## Merchant Category Codes

---

MasterCard, Visa, and online debit card networks (card types 013-018, 021-027, and 029-030) use a 4-digit numeric merchant category code (MCC) to identify the type of business conducted by a merchant.

Merchant category codes are used when a new merchant account is added to the System. They are also used in warning bulletins, authorizations, chargebacks, settlement, and in certain types of transactions classified as “quasi-cash” transactions by Visa.

Merchant category groups (MCGs) are used with the Commercial Market Analysis product and are general categories under which merchant category codes fall. The System recognizes the following seven merchant category groups when generating the Commercial Market Analysis Reports.

MasterCard also requires a single-letter transaction category code (TCC) to identify general merchant categories. The transaction category codes follow.

### Merchant Category Group Description MCG Code

Travel 1  
Lodging 2  
Dining and entertainment 3  
Vehicle expenses 4  
Office services and merchandise 5  
Cash advance 6  
Other 7

MasterCard regulations formerly referred to merchant category codes as Standard Industrial Classification (SIC) codes. Transaction category codes (TCC) were formerly called INAS type codes.

### Transaction Category Code

#### TCC Merchant Category

A Automobile/Vehicle Rentals  
C or Z Cash Disbursement  
F Restaurant  
H Hotel/Motel  
O College/School Expense  
O Hospital  
P Payment Service Provider  
R All Other Merchants/U.S. Post Exchange  
T Pre-Authorized Mail/Telephone Order  
U Unique Transaction Quasi-Cash Disbursement  
U or R Cardholder-Activated Terminal  
X Airline  
X Railroad  
X Travel Agency/Transportation

### Contracted Services
